about the presets

SCRAM! is a collection of over 100 new presets for Soundtoys Echoboy. SCRAM! started out as a musical experiment using severe limitation as inspiration: one synth - one effect. That was the only rule. The synth and effect could be used in any creative ways, but no other forms of processing or sound sources were permitted. The effect was Echoboy and quite quickly we've created not only delays, but also lofi reverbs, dirty saturation effects all the way to totally wacky effects. These presets later became this collection.

The collection comes in two flavours: one aimed to be used as SEND effects and one to be used for INSERT. The only difference is setting the DRY/WET knob. Pick the method you personally prefer to work with - install the presets - and have fun.

SCRAM contains 102 presets in the following categories:

- 22 delay effects
- 20 modulation effects
- 41 reverbs
- 19 weird effects

deep ocean for omnisphere 2

Deep Ocean is a cinematic sound expander inspired by the ambient masterpiece *Waiting for Costeau* by Jean-Michel Jarre: dark pianos drenched in reverb, quirky arpeggios and sequences, mellow synths, and atmospheric textures and soundscapes.
