FREEKING
free sounds for kingkorg

# how to install

Installing the sounds into your KingKorg is easy.

First you need to install Korgs sound manager software. It's called KingKORG Sound Librarian, is free and makes loading and making backups of sounds very easy. You can download KingKORG Sound Librarian from Korgs website.

**Please remember to make a backup of your own sounds before you transfer the new sounds to the KingKorg.**

1) Launch KingKorg Sound Librarian.
2) Go to the File menu in the top left corner.
3) Select Open…
4) Locate and load "Plughugger - FreeKing.kklib".
5) Go to the KingKORG menu.
6) Select Write Library Data.

Now the new sounds will be transferred to you KingKorg.

# about the sounds

FreeKing contains 20 new sounds that was originally designed for our soundsets The Edge and Vision - but didn't make it into the soundsets because of the hardware limitation of 100 user patches.

So we decided to make the sounds free instead of collecting virtual dust on our hard drives.

Enjoy!

# license agreement

Please read the terms of the following agreement before using this software.

The sounds that came with this agreement are the property of Plughugger, which in turn is the property of Carl Löfgren. The sounds are licensed – not sold – to you, for use in your music productions.

The right to use enclosed sounds is only granted to the original end-user of the product. This right is not transferable – which means you cannot sell these sounds second hand. If the product is sold, yours and the buyers license are no longer valid.

All lending, renting, copying, duplicating, trading or reselling of this product or its contents is naturally not allowed. You may neither upload or download this product or any sounds from it, on the Internet.

You can use the sounds in any type of *commercial or private music production* without permission or paying any further fees than the original price of the product. You may modify the sounds to your needs. The only restriction is that you must not use the sounds in an isolated manner – for public releases the sound must always be used in a musical context. You are not allowed to create a sample library based on the sounds you purchase from Plughugger.

The sounds provided are licensed "as is" without warranties of any kind. Neither the producer, nor Plughugger can be held responsible for any direct or indirect or consequential loss arising from the use of this product in whatever form.

# kingkorg reloaded

The Edge is a complete toolbox for dance productions and contains all sounds you need for modern EDM and Pop, but also Deep House and old-school house genres. The focus on the soundset is with leads, stabs and bass sounds.

Vision is a soundset that explores the cinematic and ambient side of the KingKorg, with the focus on slowly modulated pads and dark synth strings, but also cute leads, low-key basses and otherworldly soundscapes.

Click here to listen to a demo of The Edge.

Click here to listen to a demo of Vision.
