about the sounds

Back in the day when the Atari ST was the hottest music computer, german software maker Steinberg took the Atari to places no one could have imagined. Apart from inventing the sequencer Cubase (which at the time was limited to MIDI only), Steinberg also gave birth to an advanced audio editor called Avalon which was years ahead of its time. Even by modern standard, Avalon is pretty remarkable.

Avalon is at its core an audio editor capable of working with hardware sampler units both via MIDI Sample Dump and SCSI. Features included FFT analysis and effects(!), and a virtual modular synthesiser where you could patch together your own synth sounds using oscillators, filters and effects.

This on an 8 MHz computer with one megabyte of memory.

This soundset is a celebration of Steinberg Avalon and contains all the original samples as well as all the virtual synthesiser constructions. Apart from providing the raw sounds, we've also used the features of Omnisphere to take the sounds to new levels.

Thank you Steinberg. You will always be our heroes.

license agreement

Please read the terms of the following agreement before using this software.

The sounds that came with this agreement are the property of Plughugger, which in turn is the property of Carl Löfgren. The sounds are licensed – not sold – to you, for use in your music productions.

The right to use enclosed sounds is only granted to the original end-user of the product. This right is not transferable – which means you cannot sell these sounds second hand. If the product is sold, yours and the buyers license are no longer valid.

All lending, renting, copying, duplicating, trading or reselling of this product or its contents is naturally not allowed. You may neither upload or download this product or any sounds from it, on the Internet.

You can use the sounds in any type of *commercial or private music production* without permission or paying any further fees than the original price of the product. You may modify the sounds to your needs. The only restriction is that you must not use the sounds in an isolated manner – for public releases the sound must always be used in a musical context. You are not allowed to create a sample library based on the sounds you purchase from Plughugger.

The sounds provided are licensed "as is" without warranties of any kind. Neither the producer, nor Plughugger can be held responsible for any direct or indirect or consequential loss arising from the use of this product in whatever form.

hype edm for u-he hive
